INSURANCE - ST. LOUIS PARK

On December 20, I met with Mr. P. A. Klein, Safety Consultant for Employers Mutuals, and we discussed Mr. Smith's Inspection Report dated December 15, relating to recommendations submitted May 6, 1965, which have not been completed.

I understand you instructed Mr. Flaa to complete the recommendation relating to putting a fence around the tar cistern because the cover is unsafe and the cost of repairing the cover is prohibitive.

I understand also that the correction of the stop device on the conveyor from the tie adzer has not been made because it is stymied somewhere in Indianapolis. I am sending a copy of this letter to Mr. Hennessy to ask if he can institute an investigation to eliminate this hazard on the adzer which has caused serious injury.

Very truly yours,

R. J. Boyle
